**HOT WATER HIGH-PRESSURE CLEANER - WITH
TWIN OUTLETS**

**ONE OUTLET FOR HIGH PRESSURE / ONE OUTLET
AT LOW PRESSURE FOR FOAM**

This Hot Water, in place system, has been specially designed for Transport Industry & Multiuser sites. The twin lance system allows one lance to be dedicated to foam at low pressure, thus stopping the operator wasting value chemical. Alternatively, both lances can be used at high pressure.

Features:

Twin sets of hose, guns and lances

Painted steel structure with stainless steel door (Note: Image shown features the full stainless cabinet, not included in this price).

Flame control photocell.

Delayed total stop with leakage control.

Automatic by pass valve. Safety valve.

Temperature adjustment thermostat (flow switch and pressure switch).

High efficient stainless steel vertical boiler. Ventilation by independent electric motor.

Water level control float and machine stop in case of lack of water.

Double flange electric motor with elastic coupling.

24V Low tension electrical controls.

Magnetothermic overload switch.

Internal acoustic and thermic lagging (anti frost protection).

Lockable electrical controls.

Equipment:

STANDARD - Two sets of the following

- 10 m HP hose with quick coupling
- 120 cm lance
- Professional gun
- Stainless steel water nozzle

OPTIONAL

- Chimney protection
- Pre-arrangement for remote control
- Sandblasting head
- Rotating nozzle
- Stainless steel cabinet
- Electrical antiscale system
- Drain pipe kit

Performance:

- 2900 psi @ 21 L/min
- Speed 1450 rpm
- 230/400V 50Hz TRI
- Temperature 30-100
