28" Big Guy Surface Cleaner

Part Number: PP 2800WAW

The Big Guy Rotary Surface Cleaners are constructed with powder coated aluminium and a steel axle assembly - these machines provide added surface coverage to do the big jobs.

- Can be used for Hot or Cold Water Applications and saves time over cleaning by hand with a wand, while the self-lubricating twin thrust bearings provide the power to use either a two or four tip spray bar. (The 2 tip bar is included, 4 tip bar sold as an accessory).
- The resilient brush ensures that spray is confined to the surface area and not the operator or surrounding area.
- Great for car parks and large flat concrete surfaces.
- Perfect for use with 4000psi high pressure washers, but can be used with any commercial high pressure washer.
- One year commercial warranty.

Features

- 712mm wide cleaning path
- 2000psi maximum working pressure
- 15L/min
- Powder coated aluminium construction
 - Eliminates striping
