

CLEAN QUIP

Item Name

Professional Hot Water Weed Removal System

Item #

108 BWK 01BW03

PROFESSIONAL HOT WATER WEED REMOVAL SYSTEM

- Innovation in total weed removal technology using hot water. Elimination of weed and unwanted grass with a sustainable, environmentally friendly method, and without the use of chemicals
- Efficient results of BWK already visible only 24 hours after the thermal treatment
- Repeated weed removal treatments by BWK, generally 4-5 times per season, will weaken the weeds' roots from the second year to reduce their re-growth and eventually cause their destruction and elimination
- BWK has a water consumption of only 7,8 liters per minute and an electrical consumption of only 0,3 kW
- The efficient diesel-powered boiler quickly heats the water to the necessary treatment temperature, allowing the operator to start working almost instantly and at a constant temperature
- Available also in battery
- BWK can be used with various accessories according to your specific needs for precision, high productivity or both
- Descaler to prevent limescale build-up and to protect the entire machine against clogging
- Front and rear bumpers to protect the machine against damage during vehicle transport
- Appropriate for use on all surfaces such as cement, asphalt, tiled floors, soil, etc.)
- Low-noise
- Easy to use

Specifications:

- Max Flow 8L/min
- Max pressure 29psi
- Pump speed 1450rpm
- Supply voltage battery 12V dc
- Pump Ottone - brass
- Max temperature 95°C
- Fuel tank 35L
- Descaler tank 3L

Supplied Accessories:

- Lance with trigger and handle l = 105cm in M22 out M22
- Flate nozzle
- H.P. hose l=10 m R2 - 5/16" M22-M22
- 1 lt limescale inhibitor
- Hose connector
- Presa Portagomma 3/4" - Threaded tap adaptor 3/4"
