## Firebox 350 Pressure Washer Boiler System

Part Number: 00FIREBOX350

Our mobile water heater is able to heat to 140°C. Ideal to turn your 5000 psi cold water pressure cleaner into a hot water machine. Features include: A double turn coil made from steel tubing, treated with high temperature paints; New high efficiency, long life, weld-free boiler manufactured completely in stainless steel; and an electric control panel with on-off switch and thermostat. The cover and trolley are made from painted sheet metal and the Firebox 350 has great safety devices such as a check valve, safety valve, and flow meter to check for the absence of water. This unit has popular applications in agriculture, industrial manufacturing and also construction.

### SPECIFICATIONS

**Flow:** 21 lpm

**Motor Type:** Electric

**Voltage:** Single Phase 230-240V 50Hz

**Frame Type:** Powder coated

**Wheels:** 3

**Weight:** 113.8kg

**Dimensions:** 77 x 72 x 90

### FEATURES

Low water cutoff switch, check valve and relief valve

Electric control panel with ignition switch and thermostat

Thermostat control for temperature adjustment

Longlife, stainless steel, weld free boiler

Solid rubber tyres with swivel front wheel

Heats water up to 140 degrees C for thorough hygienic cleaning in automotive, agriculture, heavy transport and other industrial applications

This mobile hot water heater can be used with a cold water high pressure cleaner up to 5000psi

One year commercial warranty
